Cyprus · available for freelance

Electrical & Computer Engineering at NTUA (MEng, June 2027). I ship embedded systems and the full-stack apps around them, write the decisions down, and test what matters. Open to freelance work in embedded, full-stack, or the messy bit in between.

EXPERIENCE

- Sep 2026 – now **Digital Governor, part-time** · WisePrint, Nicosia
Software, firmware and design across WisePrint and Wiseshop. The print shop's pricing engine, job board and press queue run at the counter: 45 versions, 2,521 tests, self-updating with nightly off-site backups.
- Jul – Aug 2026 **Electrical Engineering Intern** · SignalGeneriX, Limassol · ΙΔΕΚ scholarship
RF assembly and characterisation on a VNA and spectrum analyser, and SCPI instrument control. Built Augur, a bring-up toolkit for a GNSS-guided relay controller, with NMEA decoding and a geofence on the module itself.
- Jul – Aug 2025 **Electrical Engineering Intern** · SignalGeneriX, Limassol
Test plans for an AI edge board across seven interfaces (Ethernet, RS-485, CAN, USB, CSI, GPIO, PCIe); verification automated in Linux, Bash and Python.
- Jul – Oct 2024 **Software Engineering Intern** · PHOEBE Research & Innovation
A web app that ranks fuel stations by official price and distance: API integration, responsive UI, developer documentation.
- 2021 – 2022 **Leadership role** · Cyprus National Guard
Led a team of 10 through daily operations; honorary promotion for ethics and leadership.

SELECTED WORK

All solo. Case studies and interactive demos at nikolasneofytou.github.io/personal-website; private repos are walked through on request.

- Dec 2025 – Sep 2026 **Cinna** · real-time transit for Cyprus
A Flutter app over Django REST and PostGIS that ingests the national GTFS-RT feed every 15 s, with Stripe tickets as Wallet passes. The backend is in production, with an iOS pilot on TestFlight, 1,400+ tests and 14 ADRs.
Flutter · Riverpod · Django REST · PostGIS · Celery · GTFS-RT
- Apr – Oct 2026 **Ludi** · five-a-side pitch marketplace ludi.football
A player app, an owner dashboard and a lobby TV on one Postgres. Double-booking is impossible by constraint, row-level security is covered by 426 pgTAP tests, and Stripe Connect payments are built end to end, in test mode. In beta since August 2026.
Expo · Next.js · Supabase · PostGIS · Stripe Connect
- May – Sep 2026 **Aristophanes** · a platform for amateur theatre
Each production is its own space, with seven roles, a call board, calendar, wardrobe and box office; row-level security is the only server boundary. 62 ADRs, 829 tests, in use by a 12-person cast.
Flutter · Supabase · Postgres RLS · ports & adapters · Stripe
- Aug 2026 **Πιζα** · open Modern Greek dictionary plutarch-five.vercel.app
95,774 entries with accent-insensitive search that resolves any inflected form to its entry. Live, built in four days, 98 tests.
Next.js · TypeScript · PostgreSQL · pg_trgm

Also: Aedile Table B, communal-fee shares under Cyprus' Table B formula (live) · booking and intake for a solo psychologist (in use) · Fons, Virgil and Γράκχοι (TestFlight).

EDUCATION

- 2022 – Jun 2027 **MEng Electrical & Computer Engineering** · National Technical University of Athens
Electronics, Systems & Embedded Computers: DSP, control-systems design, microcomputer systems, operating systems, VLSI.
- 2014 – 2020 **High School Diploma** · Pascal English School · GPA 19.8/20 (2nd of 80) · A-Levels: Physics A, Mathematics A, Greek A*

SKILLS

- Embedded STM32 · AVR · FPGA · ESP32 · Jetson Orin Nano · Altium · SCPI · NMEA/GNSS · VNA, oscilloscope, logic analyser
- Control PID · root locus · Bode/Nyquist · state-space · observers · LQR
- Code C · C++ · Python · TypeScript · Dart · Java · MATLAB/Simulink · Bash
- Full-stack Flutter · Expo · Next.js · React · Django REST · HTMX · PostgreSQL/PostGIS · Supabase · Redis · Stripe · Docker
- Languages Greek (native) · English (IELTS 8.0/9)
